FROM 50 € PER POINT

PORTFOLIO

RES COMPONENTS

Many years of experience in international trade pays off. Not much can surprise us in an environment that is constantly changing. We cooperate with the largest wholesalers in Europe, and for more demanding customers we import goods directly from China. With the ability to perform audits before and during production and before loading, we keep stressful situations to a minimum

RES DESIGN

The principle of excellent realisation of photovoltaic system or heat pump installation is the conceptual design.

We are preparing visualisation with PV SOL, that includes bill of materials. The heat pump systems we are design depends on client needs and manufacturers requirements

Earn business advantage, and order conceptual design.
